

## Letter of Med Nec for semi-electric hospital bed

Date:

RE:

DOB:

To whom it may concern;

(patient) is a (age) (sex) that has a diagnosis of but not limited to (diagnosis). Due to (patient) complex medical condition it is recommended that he/she receives a semi-electric hospital bed. This will allow him/her to have frequent changes in body position to prevent skin breakdown and to help alleviate contractures, and to allow easier transfer from bed to wheelchair. He/She also requires the head of the bed to be elevated in order for her/him to stay in a healthy state by being able to handle his/her secretions and to prevent aspiration. The patient is able to work the controls himself/herself.

Sincerely,

Provider
