

# Ever wonder where medicine goes once it enters the body?

The Precision Therapeutics Research Team is doing a study to measure the amount of certain medications in the brain

## Who may participate?

- Teens and young adults ages 12 to 21
- Currently taking or recently stopped taking fluoxetine, escitalopram, pimozide, pantoprazole, or lansoprazole

## What is required?

- One study visit lasting about 3 hours
- An MRI brain scan
- Blood draw
- Questionnaire forms

**Participants will receive a \$200 payment for their time**
