

Pediatría en Panamá: A Spanish International Health Experience

Vickie Blanco, MD

Children's Mercy Hospital Kansas City, Missouri

Background/Objectives

- Opportunity to practice pediatric medicine internationally
- Strengthen medical Spanish and improve Spanish communication skills
- Specific career interest in Hispanic pediatric population
- Contribute to future General Pediatric career with high volume of Spanish speaking patients
- Learn how cultures affect medical management and disease presentation
- Practice in a resource limited healthcare system
- Exposure to tropical diseases not typically seen in US

Preparation

- Global Health lectures and workshops
- Met with Travel Clinic to look at demographics, prevalent diseases, and received necessary vaccines
- CHICOS clinic provider

Reflection

- Expanded cultural competency
- Witnessed numerous barriers to medical care in resource limited settings
- Value of nationwide support/coverage for vaccines and pediatric preventative medicine
- Enhanced knowledge about tropical diseases

Experience

PANAMA CITY, PANAMÁ

Centro de Salud – Amelia Denis de Icaza
Outpatient General Pediatrics
